

Cara Install AGC Drama Cina Pakai Fly.io

Oleh Internet Marketing Dojo

1. Daftar fly.io dan install flyctl.
2. Extract zip agc drama cina
3. Lalu pakai terminal kesukaan ente (rekomendasi: <https://termius.com>), ganti directory ke directory tempat extract tersebut

4. Jalankan `flyctl launch` dan ikuti petunjuknya (jika ingin murah bisa tweak settings, pilih server virginia dan memory 256)

```
Local Terminal
buchin@dojo-2 ~ % cd ~/Deploys/agc-drama-cina-1.0.1
buchin@dojo-2 agc-drama-cina-1.0.1 % flyctl launch
Scanning source code
Detected a Laravel app
Creating app in /Users/buchin/Deploys/agc-drama-cina-1.0.1
We're about to launch your Laravel app on Fly.io. Here's what you're getting:

Organization: Mochammad Masbuchin (fly launch default
Name: agc-drama-cina-1-0-1 (derived from your
Region: Singapore, Singapore (this is the fastest
App Machines: shared-cpu-1x, 1GB RAM (most apps need about 1GB of RAM)
Postgres: <none> (not requested)
Redis: Pay-as-you-go Plan: 10 GB Max Data Size, eviction disabled (determined from app source)
Tigris: <none> (not requested)

? Do you want to tweak these settings before proceeding? Yes
```

5. Jalankan `fly deploy` dan situs ente sudah terinstall dengan alamat yang diberikan. Jika mau pakai domain lain bisa disetting di dasbor.
